

SOBIT PRATEL

Aspiring Software Engineer | B.Sc. CSIT Student

sobitpratel128@gmail.com

github.com/sobitpratel18

Portfolio / Projects

PROFESSIONAL SUMMARY

Motivated B.Sc. CSIT student and aspiring Software Engineer with hands-on experience building responsive web applications using HTML, CSS and JavaScript. Experienced with REST API integration, Local Storage, Git/GitHub and deployment using Vercel and GitHub Pages. Actively strengthening backend development, databases, Data Structures & Algorithms, and software engineering fundamentals.

TECHNICAL SKILLS

Languages	C, C++, JavaScript
Frontend	HTML5, CSS3, JavaScript, Responsive Web Design
Backend / APIs	REST APIs, API Integration, Backend Development (Learning)
Tools	Git, GitHub, VS Code, Vercel, GitHub Pages
Web Storage	Local Storage
Computer Science	Data Structures, Algorithms, Problem Solving (Learning)

EDUCATION

B.Sc. Computer Science and Information Technology (B.Sc. CSIT)

Prithvi Narayan Campus, Pokhara, Nepal

PROJECTS

Weather App

Built a responsive weather application that retrieves real-time weather data through the OpenWeatherMap REST API.

- Implemented city-based weather search with temperature, weather condition, humidity and wind speed.
- Added Celsius/Fahrenheit conversion and dynamic weather information display.
- Integrated a deployed backend/API workflow and deployed the application on Vercel.

Tech: HTML, CSS, JavaScript, REST API, OpenWeatherMap, Vercel

[Live: weather-app-two-tau-70.vercel.app/](https://weather-app-two-tau-70.vercel.app/)

Expense Tracker

Developed a browser-based expense management application for tracking income, expenses and current balance.

- Implemented transaction creation, deletion, clear-all functionality and transaction history.
- Added persistent client-side data storage using Local Storage.
- Built a responsive interface for practical everyday use.

Tech: HTML, CSS, JavaScript, Local Storage

Portfolio Website

Created a personal portfolio website to present technical skills, projects and professional software engineering goals.

- Designed a clean responsive layout for showcasing projects and skills.
- Organized project information with live-demo and source-code links.
- Deployed the website using GitHub Pages.

Tech: HTML, CSS, Git, GitHub Pages

CURRENT FOCUS

JavaScript • Backend Development • Databases • Full-Stack Development • Data Structures & Algorithms • Problem Solving

CAREER OBJECTIVE

Seeking an entry-level Software Engineering / Web Development opportunity where I can apply my programming and development skills, contribute to real-world projects, learn from experienced engineers, and grow into a strong software engineer.
